PROFESSIONAL SUMMARY

Results-oriented **Data Management Analyst** with hands-on experience in **Data Governance**, **Data Quality**, **Data Pipelines**, and **Process Improvement**. Proficient in **Python**, **SQL**, and applying **Statistics** for efficient **Data Collection**, **Data Preparation**, and actionable **Insights Generation**. Proven track record of optimizing system performance, streamlining **Performance Reporting**, and driving cross-functional **Stakeholder Collaboration**. Dedicated to designing scalable **ETL** architectures utilizing big data tools like **BigQuery** and **Airflow** to drive data-informed decisions.

TECHNICAL SKILLS

- **Languages & Core:** Python, SQL, C++, C, JavaScript, HTML, CSS, PHP, C#.
- **Big Data & Pipelines:** ETL, Data Pipelines, Apache Spark, Kafka, Hadoop, Airflow.
- **Data & Analysis:** Data Management, Data Governance, Data Quality, Data Collection, Data Preparation, Insights Generation, Statistics.
- **Databases & Visualization:** BigQuery, MongoDB, Excel, Power BI, Looker, Cloud Query.
- **Frameworks & Methodologies:** Docker, Git/GitHub, Agile, CI/CD, Process Improvement, Automation.

INTERNSHIP EXPERIENCE

NIT Trichy – CS Dept (IIT Mandi iHub) *Jan 2025 – Apr 2025*
Interactive Virtual Surgery Agent (Unity, VR, C#)

- Engineered a VR simulation with automated **Data Collection** handling **10,000+ daily records** for real-time anatomical feedback.
- Drove **Stakeholder Collaboration** with medical experts to define **Data Governance** protocols and deliver UI modules for **5+ procedures**.
- Drove **Process Improvement** by resolving rendering bottlenecks, boosting training engagement by **35%** and cutting task time by **20%**.
- Resolved **50+ critical bugs**, achieving **99.9% system stability** and ensuring strict **Data Quality**.

Web Stack Academy *Jun 2024 – Jul 2024*
Full-Stack Developer Intern (React Native, DevOps)

- Built backend services and a mobile app using React Native, implementing **CI/CD** workflows and **Automation** to increase build efficiency by **30%**.
- Optimized order workflows through data analysis to eliminate operational bottlenecks, driving a **22% increase** in on-time deliveries.
- Architected scalable **Data Management** solutions to support **1,000+ daily active users** while maintaining **99.2% crash-free sessions**.

KEY PROJECTS

Autonomous Driving System | *GitHub* *Nov 2025*
Tools: Python, OpenCV, PyTorch, YOLOv3, Kafka, Apache Spark

- Engineered a real-time safety system using **YOLOv3** for traffic light detection (**92% accuracy**) and **dlib** for drowsiness monitoring, validating against **50+ hours** of video.
- Built **data preparation pipelines** with **Apache Spark** and **Kafka** for real-time video feed streaming processing **30+ frames per second**.

BankTerm (Machine Learning) | *GitHub* *Mar 2024*
Tools: Python, Scikit-learn, XGBoost, Airflow, BigQuery

- Built predictive models achieving **85.89% accuracy** and **17% recall improvement** via SMOTE balancing to automate customer retention **Insights Generation**.
- Architected end-to-end **Data Management** workflows with **Airflow** and **BigQuery** for data governance, analyzing over **100,000 customer records**.

EDUCATION

NIT Trichy *2022 – Present*
B.Tech in Computer Science (CGPA: 5.86)
Narayana Jr. College, Vijayawada (XII) – 85.7% | **Samvida Vidya Peeth** (X) – 87.6%

ACHIEVEMENTS & LEADERSHIP

- **Manager, Org. Committee, Akshara (Jan 2024 – Present):** Spearheaded operations for NIT Trichy's Telugu wing, orchestrating **Stakeholder Collaboration** across teams to execute **15+ events annually**.
- **Manager, Vortex (NIT Trichy):** Led a publicity team of 10 for the CSE symposium; optimized a data-driven campaign utilizing **Performance Reporting** that increased participation by **40%**, drawing **2,000+ attendees**.
- **Competitive Exams:** AIR 996 in JEE Mains (Open Category) out of **1M+ candidates**; Rank 3 in Intl. Math Olympiad.
